

"My work for this period was focused on developing my manual on Basic English Course and in organizing my materials for the Moderating and Facilitating Course. To test the learning level of my students preliminary and midterm examinations were held while practical English learning sessions complement the regular English sessions.

Simultaneous with teaching English, I also attend a Vietnamese Language Study to help me understand and communicate with my co-CAEV staff. Through this activity, aside from meeting new friends and learning from their experiences, I also learned some teaching techniques from my Vietnamese instructor that I can apply in my Basic English class."
